

SHREYAS MH

Computer Science Engineering Student | Co-Founder, XTICH | AI/ML Enthusiast

Davangere, Karnataka | +91 7483794998 | shreyasmholeyache@gmail.com

LinkedIn | GitHub | Portfolio | XTICH

Professional Summary

Computer Science Engineering student and Co-Founder of XTICH with hands-on experience building full-stack applications, AI/ML projects, IoT systems, and student-focused products. Interested in artificial intelligence, product development, automation, and technology entrepreneurship, with a focus on turning ideas into practical real-world products.

Education

- **Jain Institute of Technology, Davangere** **2025 – 2029**
Bachelor of Engineering in Computer Science Engineering

Technical Skills

- **Languages:** Python, JavaScript, TypeScript, C
- **Web Development:** React, Next.js, Node.js, HTML, CSS, Tailwind CSS, Vite
- **AI / ML:** Machine Learning, Deep Learning, TensorFlow, OpenAI, Computer Vision, Data Analysis
- **IoT / Hardware:** ESP8266, Arduino, Sensors, Wi-Fi, Telegram Bot API
- **Tools / Platforms:** Git, GitHub, VS Code, MongoDB, Firebase, Vercel, Render, Figma

Experience

- **Co-Founder — XTICH** **2025 – Present**
 - Co-founded a student-focused apparel and branding venture centered on college identity, merchandise, custom clothing, and digital presence.
 - Contributed across product strategy, branding, frontend development, visual identity, go-to-market planning, and student community engagement.
- **Contributor — Versity, Student Uniform Innovation** **2025 – Present**
 - Developing a sub-brand of XTICH focused on modernizing student uniforms through contemporary design, branding, and product concepts.

Projects

- **EchoVerse — AI-Powered Memory Operating System** 2026
 - Building an AI-powered memory system connecting photos, voice notes, screenshots, PDFs, chats, and locations into a searchable knowledge system. **Tech:** Next.js, Express, MongoDB, OpenAI.
- **MH AI Steering Wheel — AI / Computer Vision** 2026
 - Developing an AI-focused steering-wheel system exploring computer vision, real-time interaction, intelligent control, and hardware integration. **Tech:** Python, OpenCV, Arduino, Machine Learning.
- **Doubt System — Student Learning Platform** 2025
 - Built a platform for students to submit doubts, discover solutions, collaborate with peers, and navigate academic content. **Tech:** HTML, CSS, JavaScript, Firebase.
- **SecureVault — Password Manager** 2025
 - Developed a responsive password manager with password generation, categories, search, filtering, and persistent local storage. **Tech:** HTML, CSS, JavaScript, LocalStorage.
- **IoT Laser Security System** 2025
 - Developed an ESP8266 security system detecting laser-beam interruptions and sending remote alerts through Telegram. **Tech:** ESP8266, Arduino, Telegram Bot API.
- **Personal Portfolio** 2025
 - Designed and developed a responsive portfolio showcasing projects, experience, technical work, and product-building work. **Tech:** React, TypeScript, Tailwind CSS, Vite.

Additional

- Currently expanding knowledge in Artificial Intelligence, Machine Learning, Deep Learning, Neural Networks, and Computer Vision.
- Interested in building technology products at the intersection of software engineering, AI, entrepreneurship, and real-world applications.
